

AMENDMENTS TO THE ABSTRACT

Please amend the Abstract as follows:

A cross car beam includes a first cylindrical body ~~extending~~ that extends from a driver's side to an assistant driver's side along a vehicle-width direction, and a second cylindrical body ~~wound about the~~ that is provided around an outer periphery of the first cylindrical body's part body on the driver's side. A steering support bracket is formed on the circumferential surface of the second cylindrical body. An air-bag casing is provided on the first cylindrical ~~body's~~ part body on the assistant driver's side. The cross car beam is provided, between the driver's side and the assistant driver's side, with an opening in communication with an air conditioning unit.
